Sylhet, Bangladesh.

SKILLS:

- React
- JavaScript
- Java
- Html
- CSS
- MongoDB
- Express JS
- MySQL
- Node JS

LANGUAGE:

- English
- Bangla

CAREER OBJECTIVE

As a passionate and diligent Computer Science and Engineering fresher, I aspire to leverage my programming and analytical skills to contribute to innovative software solutions.

My objective is to secure an internship or entry level position in a dynamic tech company, where I can grow through hands on experience, continuous learning, and collaboration with experienced professionals. I aim to use my technical expertise to solve real-world problems and drive technological advancements.

RECENT PROJECTS

Project 1: Wedding Management Website *Technology: HTML, CSS, JavaScript*

Developing a dynamic website to streamline wedding planning. It includes features for guest list management, RSVP tracking, event scheduling, and vendor coordination. HTML structures the site, CSS ensures aesthetic appeal and responsiveness, and JavaScript enables interactive functionalities like form validations and dynamic updates, providing an intuitive user experience.

Project 2: Bloodbank Management System *Technology: JAVA, MYSQL*

Creating a robust system to manage blood bank operations. The project involves developing a platform to track blood donations, inventory levels, and donor information. Java is used for building the application's logic and functionality, while MySQL handles database management, ensuring secure storage and retrieval of data. The system aims to enhance efficiency in blood bank management by automating key processes.

EDUCATIONAL QUALIFICATION

HSC (Science): GPA 5.00

BSc Honors: BSc (Engg) in Computer Science and Engineering (2022 - Present) CGPA:3.8
